Assess the Visibility and Perception of Environmental Engineering in the Civil Sector

A questionnaire survey was carried out to assess the awareness and perception of the environmental engineering degree and environmental consciousness. 661 people responded. The following feedback was received from peoples:

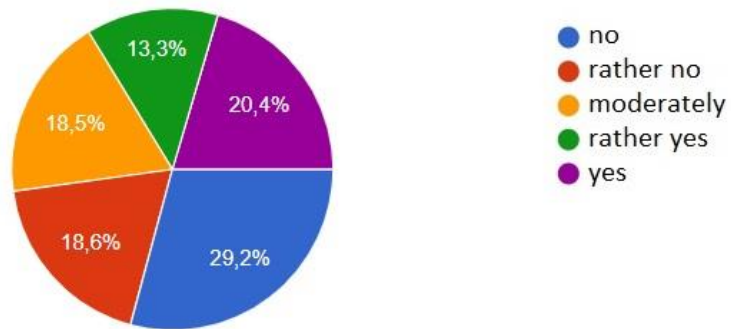

Do you consider environmental protection important?

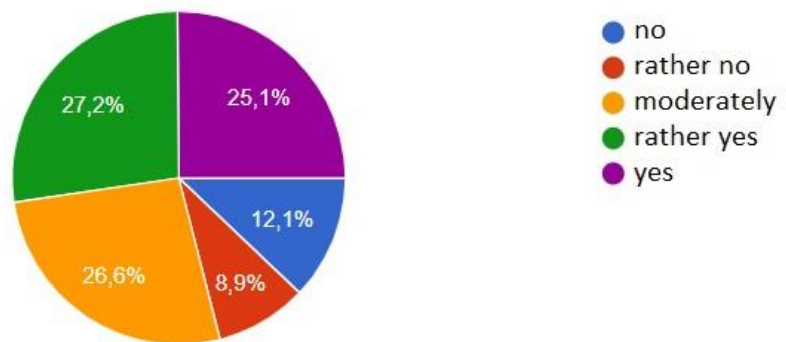

Would you take active steps to protect the environment?

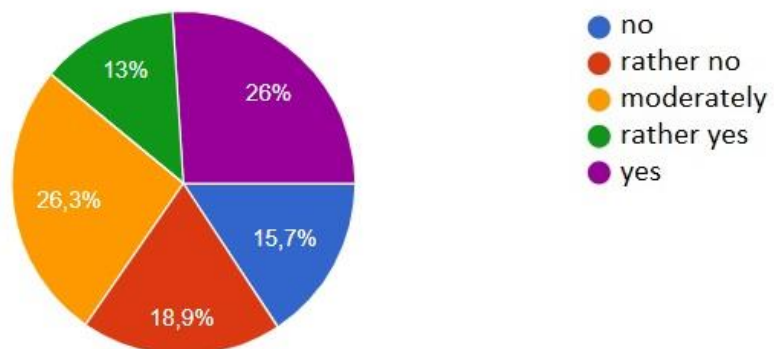

Have you thought (if you could) about training in the field of environment and sustainability, so that you can apply for a specialised course in higher education?

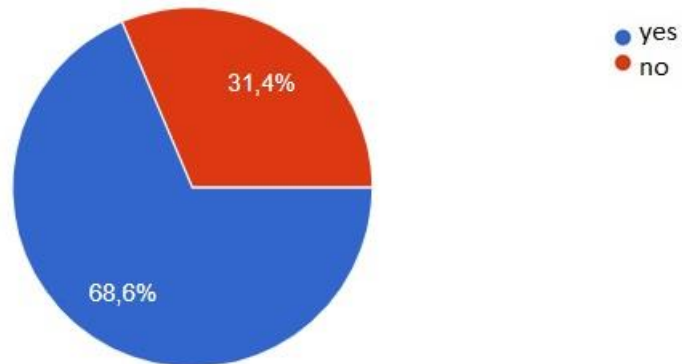

Have you thought (if you could) about educating yourself or your child/grandchildren/acquaintances in the field of environment and sustainability?

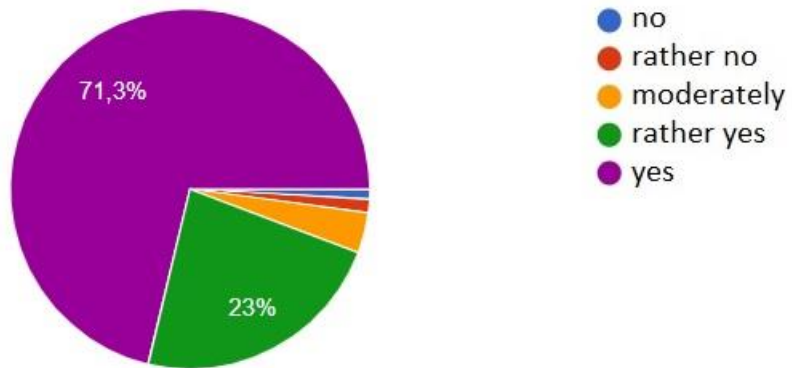

Have you learned about the environment and environmental development in public education at a level that satisfies your interests?

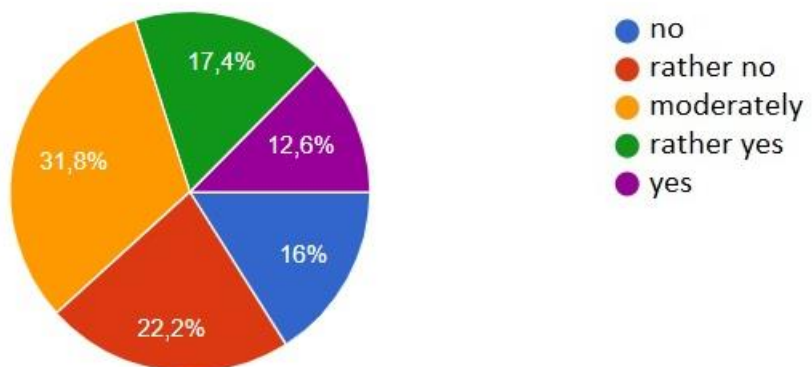

Have you heard of higher education courses in environmental engineering/environmental science?

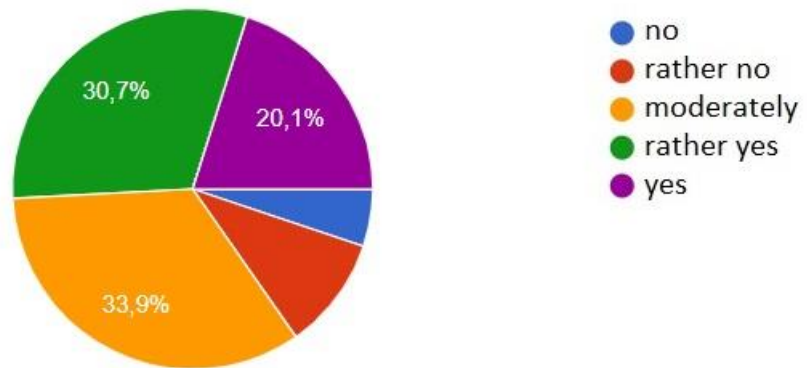

Do you think higher environmental education is needed?

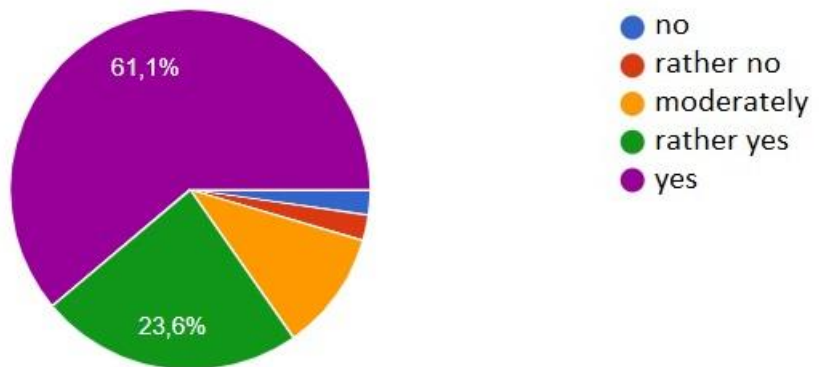

Do you know what the job of an environmental engineer is?

Do you follow environmental news, events and developments?

Are you worried that your future will be negatively affected by climate change?

Capacity building in the field of higher education
